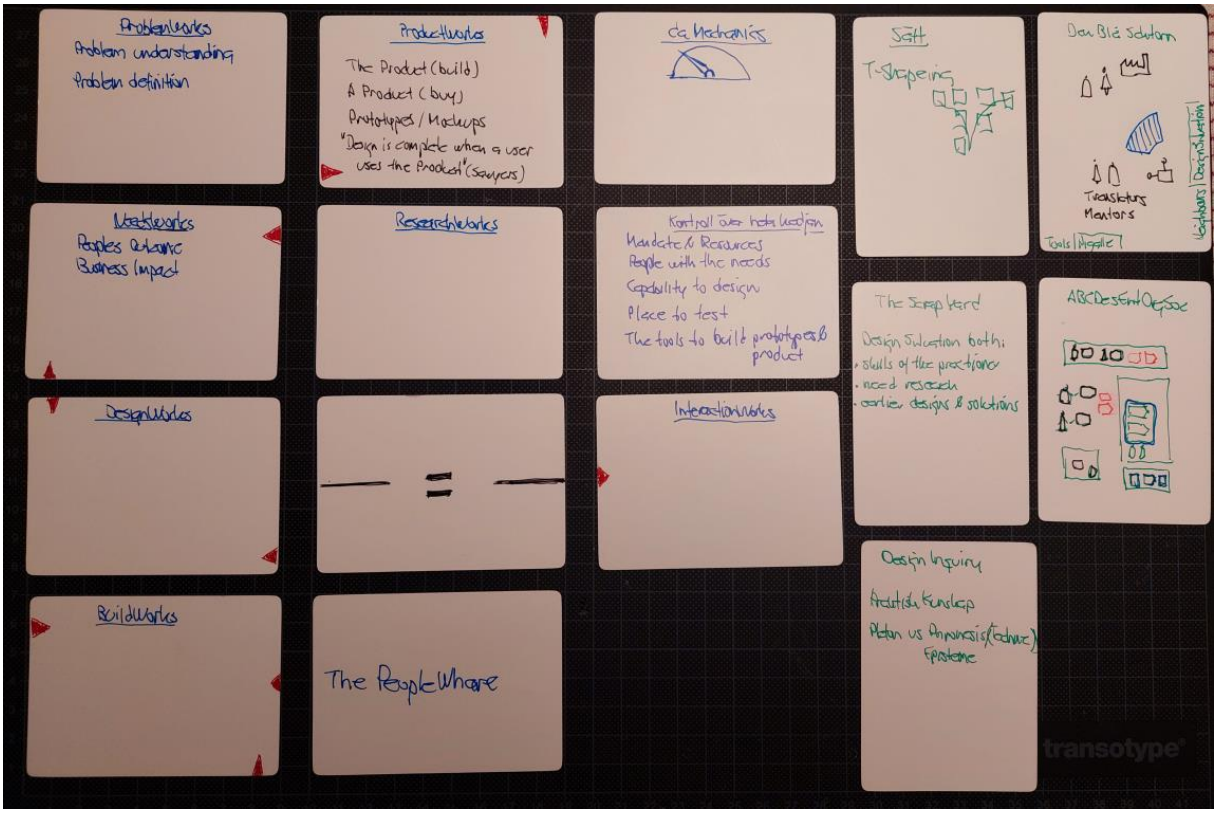
About

The concept here is to make a design situation way of working tangible and implement the design space and different work mechanics. It is inspired by board game design. To be able to explore and discover a way of working for a specific situation, it is built as a set of cards that can be arranged in different ways. This also makes it more portable.

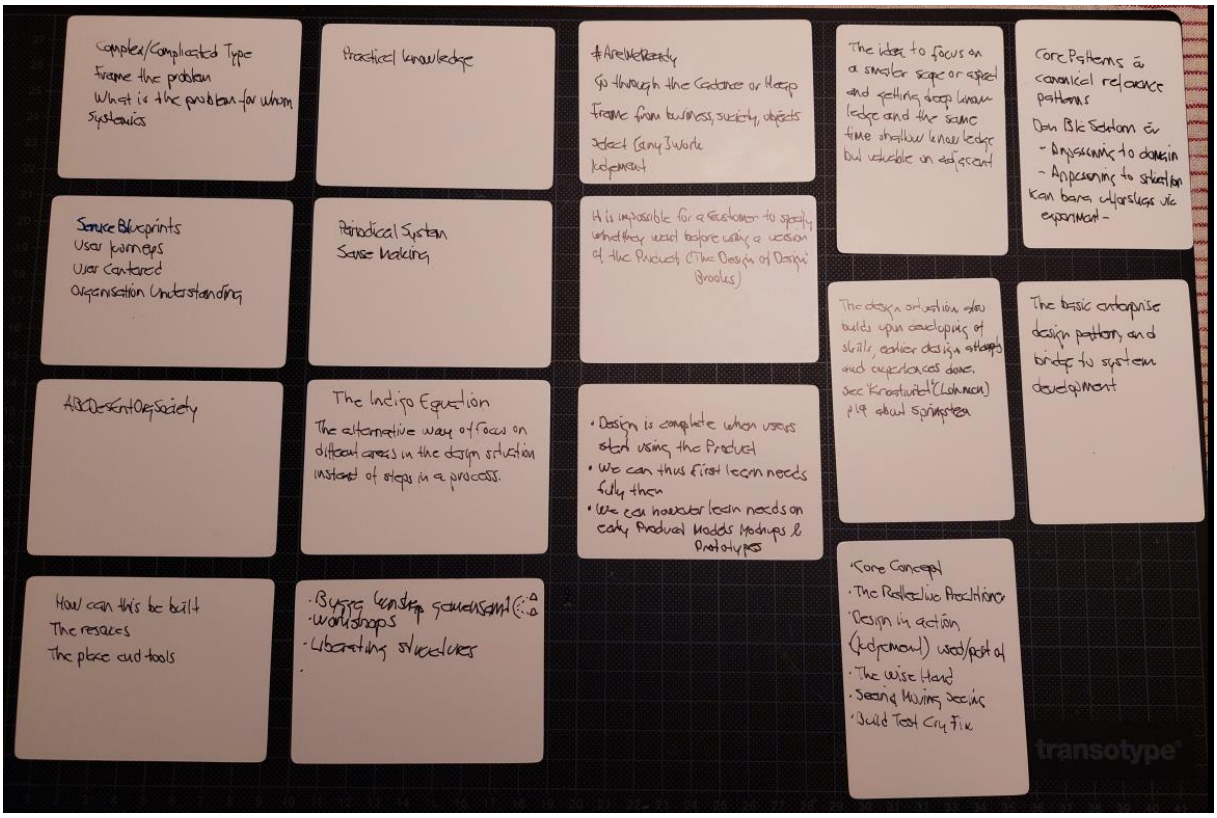
As is appearant, this is an early prototype. It is possible that these cards will be printed and sold. What we plan is to provide digital artwork to be printed on a laser printer and glued on the cards.

It is also possible to realise this product as a digital tool and work on this is ongoing but tbd for now.

Design Space



These are the different parts of the design space. The cards can be flipped over to show some very brief explanation.

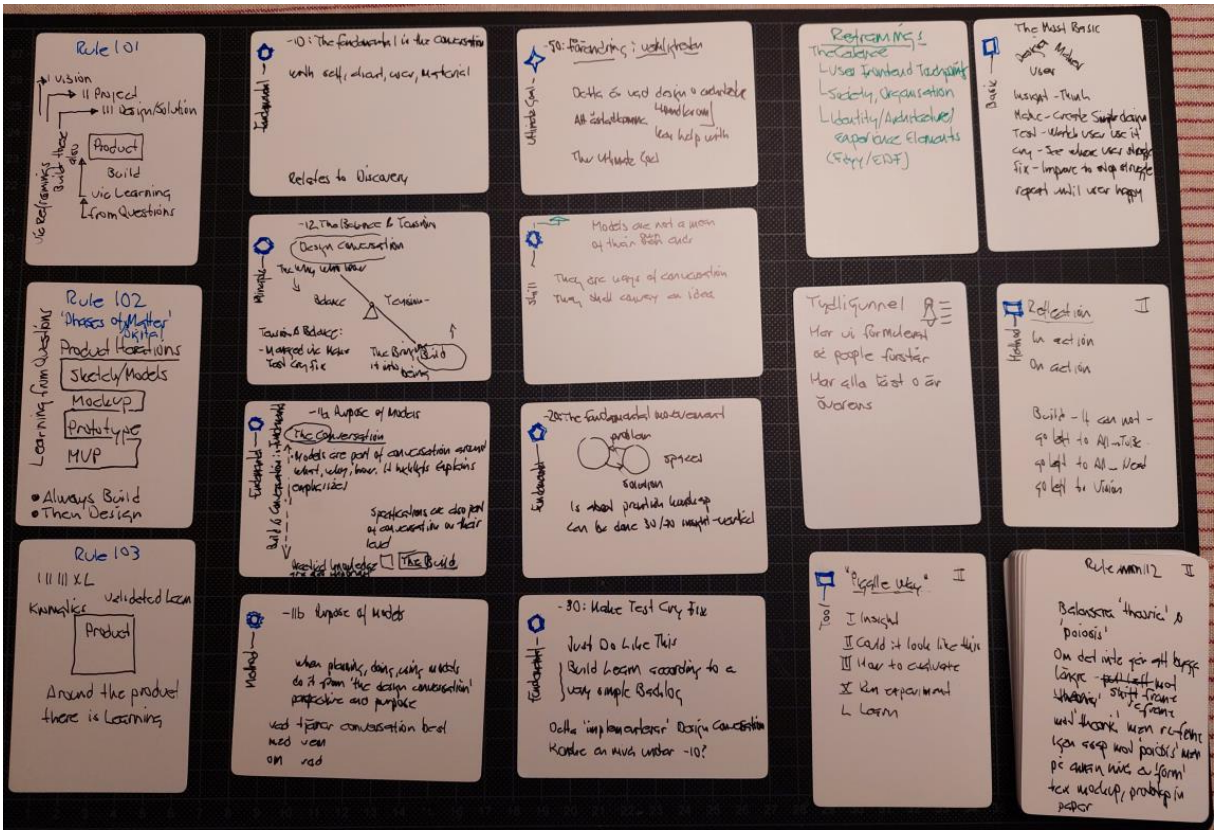


Backside.

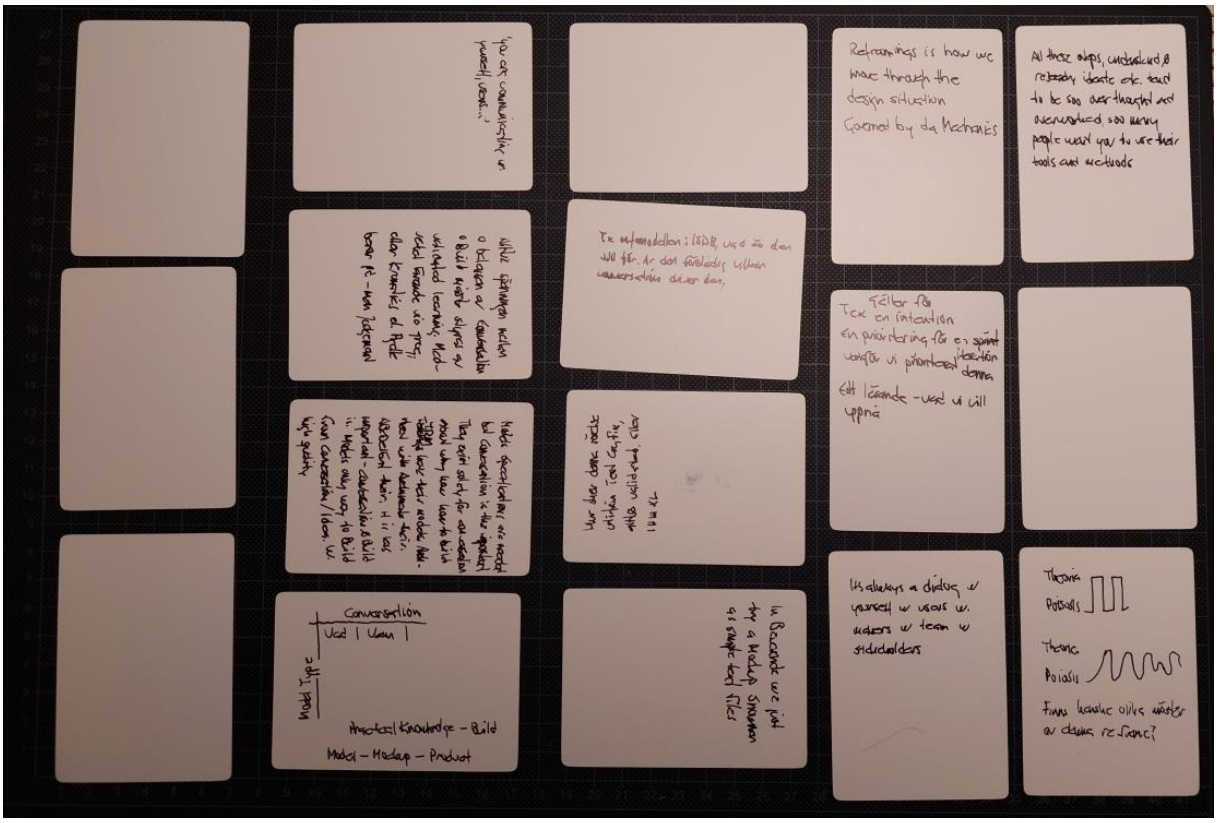
Explanation

This is tbd but see _Product_100_Requirements for now where some of the spaces are described and also one basic setup.

Helpers



These are a set of different helper tools, each describing a way of thinking, a concept, a brief method. Again, the cards can be flipped for additional information on the back.



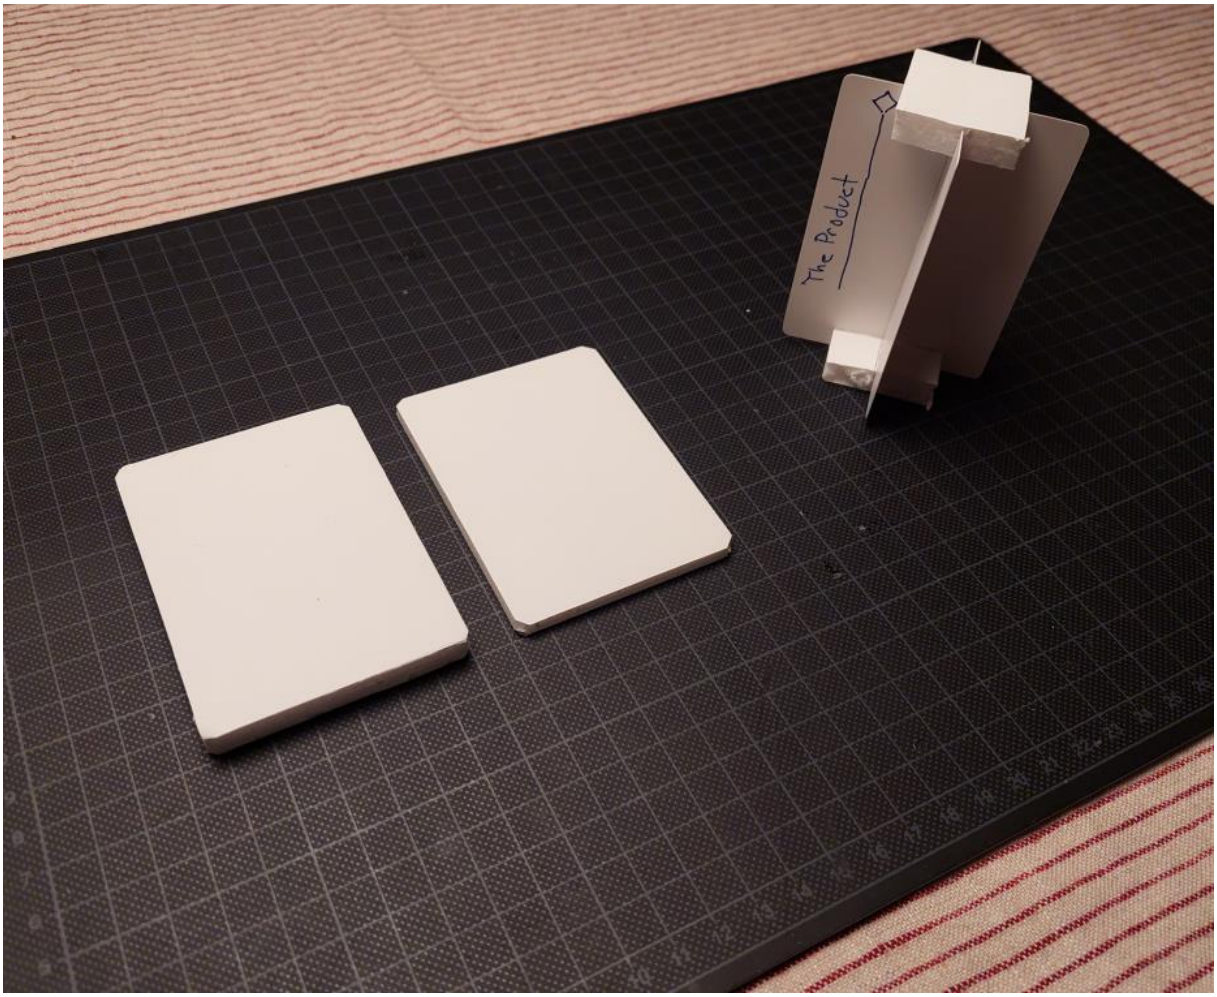
The back side.

Explanation

Explanation is tbd.

There is also a large set of additional helper cards, not shown above.

Third Dimension Additionals



These are additional ways of exploring the use of a third dimension.

To the left is raisers, to highlight a certain space or tool.

To the right is a tangible, conceptual product to accompany the ‘Design Works’ space.

Material

To the left is standard playing card, 8.9x6.5 cm, from e.g. Amazon.

Pens used are permanent marker pens that dry immediately, have narrow tip and comes in a limited range of colours. These have proved to work very well. The brand to the left is Faber Castell Multimark Permanent and to the right Staedtler Lumocolor Permanent CD/DVD and Permanent Special. Available e.g. from Amazon or local artist material shop.

Also used is standard foamboard, 3 and 5 mm, for three dimensional helpers, the Raisers and Conceptual Product. Available e.g. from Amazon or local artist material shop.

To store cards and being able to easily carry around, boxes in various sizes, top of the picture. The material is clear acrylic and quality very good. The brand is Ultra Pro 10, 25, 50-Count Two Piece Box. Available e.g. from Coolcard.se.
